

Stimson Bonner Mill PCB Clean-up Project

DEQ Quarterly Project Report

Reporting Period: October - December 2016

State Project Officer: Keith Large

Funding Code: Org. Unit 483822

Fund Source: CECRA - PRP Cost Recovery

Monthly Narrative:

This will be the last quarterly report for this project because the project is transitioning into the ICs and O&M phase and there won't be enough work to report on except for once a year or as needed. The remedial action is completed for this project; no further RA work is anticipated at this time.

- A few phone calls with Stimson and NewFields staff to finish up the Phase IV work effort
- The Phase IV removal action was completed on March 30, 2016
- The Phase IV Substantial Construction Completion Inspection occurred on April 14, 2016
- The Phase IV Construction Completion Report was finalized on December 30, 2016
- June 2016 Groundwater monitoring well sampling data; PCBs were non-detect
- Still waiting on lab results from the December 2016 groundwater sampling event
- The next site inspection and groundwater sampling event will be in June 2017

Additional project information is at: <http://deq.mt.gov/Land/fedsuperfund/stimson>

Documents Received and/or Reviewed during the reporting period

- Stimson AOC Monthly progress reports
- Final Phase IV Remedial Action Report (NewFields)

Travel and Site Visits

December 12 Site visit to oversee December 2016 groundwater sampling event

Meetings

December 9 Call with Stimson staff to make sure paperwork is getting done to complete all Phase IV activities, everything seemed to be OK and in good shape

Monthly Cost Performance:

- This is a CECRA (state superfund) cost recovery project. DEQ bills Stimson for cost once a month unless there are not enough charges to justify an accrual
- Total DEQ Project Manager hours for SFY 2017 – 97.10 hours
